## Ti nspire cx cas student software license

My Account | Order StatusHome / Shop / Calculator Software / Texas Instruments / TI-Nspire CX CAS Student Software / TI Nspire CAS Student Computer Software School-Managed Licenses with 365-Day Term – Electronic Delivery – Minimum Purchase is 30 LicensesDownload TI\_Nspire Student Software Guidebooks v3.9 Here: Student Software Guidebook | Installation Guidebook | Reference GuideSchool-Managed License (PC and Mac®) – Minimum purchase is 30 licenses at 15.00 each. •Allows access to the software on a fixed number of computers for specific users. •Software can be deployed with many standard deployment methods. •License distributed to computer from a license service (i.e., server) •Software license contains a "grace period" allowing software to be used at home or outside of the school's network for 30 days. After this grace period expires, the computers must connect to the school's network to continue use. •Perpetual Licenses require an annual license extension at no additional charge. Download TI\_Nspire Student Software Guidebook for version 3.9 TOOLS FOR SCHOOL AND HOME TI-Nspire Student Software for homework. The TI-Nspire or new full-color TI-Nspire CX graphing calculator for class assignments. Identical handheld– software functionality. Take what you've started in class on the handheld and finish on your home PC or Mac® computer. Classroom-to-Homework Mobility Transfer class assignments from handheld to personal/home computer. Complete your work outside of school, at home, on the bus, in the library. Interactive Learning Calculate, graph, write notes, build spreadsheets and collect data, all with one software. View multiple representations of a concept on a single screen. System Requirements Windows® XP Professional SP3, Windows® XP Tablet PC Edition, Windows Vista® Home Premium SP2, Windows Vista® Ultimate SP2, Windows Vista® Business SP2, Windows® 7 Home Premium SP1, Windows® 7 Ultimate SP1, Windows® 7 Professional SP1 Compatible with 32-bit and 64-bit Operating Systems Processor Speed: 1.2 GHz (Recommended: 2 GHz or higher) RAM: 1 GB (Recommended: 2 GB or higher) Hard drive: Approximately 1 GB of available hard-disk space Screen resolution: 1024 x 768 DVD-ROM drive or active internet connection for installation Adobe® Flash® Player ActiveX Control Version 10 or higher Mac® OS X 10.6.8, 10.7.3 Processor: Intel® Processor RAM: 1 GB (Recommended: 2 GB or higher) Hard Drive: Approximately 500 MB of available hard-disk space Java for Mac OS X 10.7 or Java for Mac OS X 10.7 Update 1 or Java for OS X Lion 2012-003 Screen resolution: 1024 x 768 DVD-ROM drive or active internet connection for installation Adobe® Flash® Plugin Version 10 or higher Overview Specifications Resources Animated path plot Visualize function, parametric and polar graphs as they are drawn in real time. Dynamic coefficient values Explore direct connections between dynamic coefficients in equations and graphs. Points by coordinates Create dynamic points defined by coordinates, sliders or expressions quickly. Tick-mark labels Label axes scales to create visual contexts that promote understanding. Python Programming Create and run Python programs. TI-Basic programming enhancements Write code for visual illustration of key math, science and STEM ideas. deSolve wizard Reduce syntax errors in solving differential equations. Disable CAS Disable algebraic functionality easily in the Press-to-Test dialog box or in document settings. Explore symbolic algebra and symbolic calculus, in addition to standard numeric calculations. View exact values — in the form of variables such as x and y, radicals and pi — when doing step-by-step arithmetic, algebraic and calculus calculations. View multiple representations at the same time and recognize updates to representations as things change mathematically, promote conceptual understanding regardless of students' individual learning styles. Use the PublishView™ feature to add TI-Nspire™ applications, rich text, hyperlinks, images or videos and create interactive worksheets, lab reports and homework assignments. In addition to the normal computer view, you can also work on documents in the special handheld view, which shows documents as they appear on the TI-Nspire™ CX CAS graphing calculator display. Students can easily transfer work between their TI-Nspire™ CX CAS graphing calculator and computer to complete work outside of school, at home or at the library. Take home TI-Nspire™ CX CAS Student Software and the TI-Nspire™ CX II CAS graphing calculator together in a single package. Make an all-in-one purchase at your retailer. Computer Algebra System (CAS) capabilities Function, parametric, polar, conic, sequence and 3D graphing MathDraw uses touchscreen or mouse gestures to create points, lines, triangles, and other shapes Multiple graphing functions can be defined, saved, graphed and analyzed at one time User-defined list names in Lists & Spreadsheet application Eleven interactive zoom features Numeric evaluations in table format for all graphing modes Interactive analysis of function values, roots, maximums, minimums, integrals and derivatives Six different graph styles and 15 colors to select from for differentiating the look of each graph drawn Matrix operations: Transpose and augment matrices, use elementary row operations: find inverse, determinant and reduced row echelon forms, convert matrices to lists and vice versa, calculate eigenvalues and eigenvectors List-based, one- and two-variable statistical analysis, including logistic, sinusoidal, median-median, linear, logarithmic, exponential, power, quadratic polynomial, cubic polynomial and quartic polynomial regression models Three statistical plot definitions for scatter plots, xy-line plots, histograms, regular and modified box-and-whisker plots and normal probability plots Advanced statistics analysis, including 10 hypothesis testing functions, seven confidence interval functions and one-way analysis of variance Eighteen probability distributions functions, including the cumulative distribution function (CDF), probability density function (PDF) and inverse probability distribution function for normal, chi-squared, t-, and F- distributions; and the CDF and PDF for binomial, geometric and Poisson distributions Built-in interactive geometry capabilities TI-Nspire™ Documents (.tns files) — compatible with TI-Nspire™ Software, TI-Nspire™ graphing calculators and TI-Nspire™ Apps for iPad® — can be created, edited, saved and reviewed Use images (.jpeg, .jpg, .bmp, .png formats) that can be overlaid with graphical elements Explore mathematical expressions in symbolic form, see patterns and understand the math behind the formulas Chem Box feature allows easy input chemical formulas and equations Visualize multiple representations of a single problem in algebraic, graphical, geometric, numeric and written forms Manipulate linked representations of properties to instantly update the others and show meaningful connections without switching screens (for example, grab a graphed function and move it to see the effect on corresponding equations and data lists) Windows® system requirements Windows® OS: Windows® 10 Compatible with 64-bit operating systems Processor Speed: Intel® Core i3 or higher generation processor (Except Intel® Atom) RAM: 2 GB Hard drive: Approximately 500 MB of available hard-disk space Screen resolution: 1024 x 768 (minimum) to UHD 3840 x 2160 (maximum) Active internet connection for installation Mac® system requirements Mac® OS X 10.14, 10.15 Processor: Any Mac® 2012 or newer and some 2010 models RAM: 2 GB Hard Drive: Approximately 500 MB of available hard-disk space Screen resolution: 1024 x 768 Active internet connection for installation With Python, as well as TI-Basic, you have different options for coding languages Features A dedicated programming environment as well as programming libraries for global access to user-defined functions and programs Single-user license (PC and Mac®) Provides one software license for one computer Volume License (PC and Mac®) Allows access to the software on a fixed number of computers Software can be deployed with many standard deployment methods Software is activated online Software not required to be connected to the network in order to be used School-managed license (PC and Mac®) Allows access to the software on a fixed number of computers for specific users Software can be deployed with many standard deployment methods License distributed to computer from a license service (in other words, server) Software license contains a grace period allowing software to be used at home or outside of the school's network for 30 days; after this grace period expires, the computers must connect to the school's network to continue use Perpetual Licenses require an annual license extension at no additional charge Compatible with TI-Nspire™ Lab Cradle, Vernier EasyLink® USB sensor interface and Vernier EasyTemp® USB temperature sensor systems to allow collection and analysis of real-world data Graphing calculator support Compatible with TI-Nspire™ CX, TI-Nspire™ CX CAS, TI-Nspire™ CX II and TI-Nspire™ CX II CAS graphing calculators One-year limited warranty Toll-free help hotline: 1.800.TI.CARES Email: ti-cares@ti.com Classroom activities available Workshop Loan Program: You can borrow TI calculators for evaluation or workshops TI Technology Rewards program: Accumulate points redeemable for additional TI products and services Complete guidebooks available Take advantage of TI's comprehensive suite of free activities and services for your computer software. TI-Nspire™ guidebooks are available to help you learn to use TI-Nspire™ technology. Make sure your computer software is updated with the newest features and functionalities by downloading the latest version.
